Products for kids - Solutions for parents

## Discover the patented Storage Beanbag!

Andrea, a NYC mother of two kids, needed a solution to de-clutter her own home, and came up with the genius idea of the Storage Beanbag with beans on the top and storage on the bottom. The storage compartment can be used for seasonal clothes, bedding, towels, soft toys, costumes, and much more. All unsightly clutter is hidden while you sit on it, use it as an ottoman, or watch the kids play with it. It is perfect for urban spaces, play rooms, bedrooms and dorm rooms where you always seem to lack both storage and seating solutions.

Proudly made in the United States, it has a capacity of holding 5,650 cubic inches of storage. It comes in different fabrics and colors to match any room décor. The fully washable micro-suede is available in charcoal, navy blue, dusty rose, white and chocolate, and retails at \$159. The cotton fabric is spot clean or dry clean and comes in a color for every taste - erase pink, purple, aqua, medium blue, butternut cup, orange, red and black retailing at \$149.
